Statement on Dismantlement of Government Accountability Board

MADISON – Rep. Gordon Hintz (D-Oshkosh) released the following statement regarding Assembly Bill 388, which dismantles the Government Accountability Board.

“Since the Government Accountability Board was created as a direct response to the darkest episode of political corruption in Wisconsin’s history, I can only assume that is what the majority party wishes to return to. Time and time again, Republicans have shown they will always place partisan power grabs above the best interests of the state.

“No one in their right mind thinks that Wisconsin needs more money and even more corporate influence in politics. The only ones who think differently are the ones who have something to hide.

“This is yet another effort to eliminate transparency and accountability in Wisconsin. Republicans have consistently demonstrated they are more interested in consolidating power than governing our state effectively.”
