WISCONSIN FEBRUARY UNEMPLOYMENT RATE STEADY AT 6.9 PERCENT

Preliminary BLS estimates: State gains 8,300 total jobs from January to February

MADISON – The Department of Workforce Development (DWD) today released the U.S. Bureau of Labor Statistics (BLS) preliminary data for February, showing Wisconsin's unemployment rate remained at 6.9 percent (seasonally adjusted) from January. Wisconsin also added an estimated 8,300 total jobs over the month.

"Wisconsin's preliminary February unemployment rate remains below 7 percent, the lowest it's been since December of 2008, and well below the national rate," DWD Secretary Reggie Newson said. "In addition, the preliminary monthly estimates indicate continued job growth overall."

Unemployment Rate

Based on unemployment insurance claims and a monthly survey of 1,400 households, BLS said Wisconsin's seasonally adjusted unemployment rate for February was 6.9 percent, unchanged from January, but down from 7.6 percent in February 2011. The unemployment rates encompass Wisconsinites who are available for work and actively seeking jobs and are generated by BLS from Wisconsin household surveys and other input.

The U.S. seasonally adjusted unemployment rate was 8.3 percent, also unchanged from January and down from 9.0 percent in February 2011.

Wisconsin unemployment rates remain below the national rates and, through January, below rates of other major manufacturing Midwest states including Illinois, Indiana, Michigan and Ohio.

The BLS place of residence data also estimated that more people are working and fewer are unemployed, when comparing data either month to month or year to year. The over-the-year comparison shows an estimated 12,800 more people employed, and a 24,200 decrease in those unemployed. The corresponding over-the-month estimates show 5,100 more people employed, and slightly fewer unemployed.

Place of Work Data

Based on a monthly survey of employers, preliminary seasonally adjusted data show a gain of 4,000 in private sector jobs from January to February. Sectors with job growth and their one-month gains were: education and health services, 2,500; construction, 2,100, and professional and business services, 1,400.

Seasonally adjusted data also show that, compared to January, total nonfarm employment increased 8,300, including the private sector and a 4,300 increase in government jobs. Compared to February 2011 data, government employment was down 17,400.

Cautionary note to users: Revised methodological procedures mandated by the U.S. Bureau of Labor Statistics (BLS) force individual state estimates of employment into closer alignment with the national estimate. This change results in larger month-to-month employment change for the states and the information reported by DWD.
