Senate Economic Development Listening Tour Announced

Madison- Today, Senator Gudex (R-Fond du Lac) announced a five-stop listening tour around the state. The Senate Economic Development and Commerce Committee will be hosting informational hearings to gather feedback from local business and economic development leaders. The focus will revolve around the ways we can improve our economy and things the legislature can do to assist job creators.

“This listening tour will provide legislators an opportunity to get outside of Madison to hear from the real job creators in our state. The committee will take testimony from guests at the five locations in addition, citizens can submit comments and suggestions to the committee via a website. I’m excited to hear from our partners around the state and I’m ready to assist them any way that we can said State Senator Rick Gudex.”
