Dear Senator Lassa:

I wish to express my support for the C.O.R.E Jobs Act legislation now pending.

In the last 25 years the majority of new jobs in United States were created by new companies. In fact, if you took out all of those jobs they would be a negative employment figure for the US economy when it comes to job creation.

I cofounded and co- direct an Angel investment network. We capitalize early-stage companies. The current Angel tax credit is a terrific program that needs to be expanded. It has helped us attract high net worth investors who are willing to take the financial risk to get these companies going.

Some of the other programs you're looking at such as microloans and assisting in tech transfer would also helps jumpstart this economy.

Major corporations are downsizing and will continue to do so. If Wisconsin wants to be leader in creating jobs, and the Wisconsin's representatives should vote into law the C.O.R.E. legislation now under consideration.

Thank you

Daniel J. Steininger
