WisVote History

Before 2006	*No* statewide voter registration or database
2006	Failed AESM launch (Accenture Election System Manager)
2008	State launches SVRS (Statewide Voter Registration System)
2014-2015	WisVote development
2016	State launches WisVote
2017	WisVote adds OVR functionality
2018-2019	WisVote adds new security features
2020	WisVote adds USPS absentee ballot tracking

wd4

Q

N425-8573

1

All inactive
All predate WisVote
All predate the WEC/GAB

The Database

- Is not the Voter Rolls

- Is not the Pollbooks

- Is permanent

- Is Wisconsin's election history

- Is growing with Wisconsin

SLIDE 9

625,000 dead people on voter rolls

FALSE

Inactive Voters are Ineligible Voters

Ineligible voters are removed from the voter rolls; they do not appear on poll books.

Customers asking for the entire statewide database receive both active and inactive records because that is what they asked for.

"Entire database" means everything.

Inactive Voters are Ineligible Voters

Clerks **can** reactivate an inactive record

- Transaction is recorded

- Must provide explanation for the action

- Can only reactivate one record at a time

⊕ wisvoteuat.wi.gov

You can select only one record at a time for this action.

OK

WisVote Access

3400 users to manage 1922 jurisdictions

- New users must be authorized by their clerk; new clerks validated by the next higher election official

- User Agreement & Data Confidentiality Agreement

- Security Awareness Training

- Remote Endpoint Monitoring

- Credentialling with Multifactor Authentication

- User Training

Data Quality Partners

ERIC Member States

Data Availability

- Over 2,000 requests fulfilled since 2020

- Average transaction $655.48

- Through 2021 all revenue returned to the state's general fund.

- Sensational Claims
- Rhetorical Questions
- Missing Information

Found tens of thousands of illegally cast ballots to date

1. Gain access to the statewide system. Create a new voter but do it in such a way that all evidence of the transaction is hidden.

2. Prevent the automatic new registration notification from being sent to the jurisdiction (may require some programming).

3. Block the automatic transmission to the Department of Transportation so that the record is not checked. OR allow the data check but ensure that the record of the check is destroyed.

4. Create an absentee ballot request that allows the ballot record to generate. But eliminate all records of the request.

5. Ensure the request comes from someone with a photo ID on file or upload a photo ID to the system so that a ballot can be issued.

6. Block the automatic transmission of the absentee ballot request.

Cast an "illegal" ballot

1. Gain access to the statewide system. Create a new voter but do it in such a way that all evidence of the transaction is hidden.
2. Prevent the automatic new registration notification from being sent to the jurisdiction (may require some programming).
3. Block the automatic transmission to the Department of Transportation so that the record is not checked. OR allow the data check but ensure that the record of the check is destroyed.
4. Create an absentee ballot request that allows the ballot record to generate. But eliminate all records of the request.
5. Ensure the request comes from someone with a photo ID on file or upload a photo ID to the system so that a ballot can be issued.
6. Block the automatic transmission of the absentee ballot request.

7. Ensure the USPS tracking code is tracked in the mail from clerk to voter.
8. Ensure you've created the proper bar codes on the certificate envelope but make sure there's no record of the bar codes being generated.
9. Ensure the ballot return is recorded properly, or block the ballot return record while somehow maintaining the correct number of ballots.

Cast an "illegal" ballot

7. Ensure the USPS tracking code is tracked in the mail from clerk to voter.
8. Ensure you've created the proper bar codes on the certificate envelope but make sure there's no record of the bar codes being generated.
9. Ensure the ballot return is recorded properly, or block the ballot return record while somehow maintaining the correct number of ballots.
10. Decide whether to count the ballot in public or simply have a paper ballot record so that your final ballot count matches.
11. Ensure you've documented the final disposition of the ballot. This will be associated with a specific voter record so figure out a way around that. Voting in person? Sign the poll book.
12. Erase or otherwise block the participation record from appearing in MyVote Wisconsin
13. Retain the paper ballot record so that your ballot count matches.

Enlist the help of WEC staff, DET staff, DOT staff, County Clerks, Municipal Clerks, staff in county and municipal clerk offices, the United States Postal Service, and several federal agencies.

*Repeat 50,000 times without anyone noticing.*

Real Issues – Real Action

- Civic groups providing <u>evidence</u> of specific fraud or problems.

- Researched and documented referrals for voter fraud

- Non-residential addresses are a problem

- Manual data entry

- Failure to perform due diligence before publicly implicating legitimate voters as fake or illegal

WisVote

- Is a comprehensive database and elections management system
- Is complex and constantly changing
- Is not Wisconsin's "voter rolls"
