Rep. McCarville Applauds Governor Evers' Plans for the Future of Wisconsin

MADISON - Today, Governor Tony Evers delivered his State of the State Address in the Wisconsin State Capitol, where he looked back on his successes and laid out his goals for Wisconsin's future

Representative McCarville released the following statement:

"I'm so glad that Governor Evers has prioritized middle and working class families. The democrats have worked hard to make life easier for all of Wisconsin. His plans for lowering prescription drug costs, increasing funding for mental health services, and his continued efforts to invest in jobs and keep jobs in our state will make a noticeable difference in every Wisconsinites' life.

"I was also pleased to hear that the Governor wants to focus on policies that will help Wisconsin's children. I look forward to working with the Governor to lower childcare costs, offer healthy meals to all students, and strive to make our schools and communities safer from gun violence.

"I applaud Governor Evers on his plans for the future of our great state and look forward to his continued leadership as we begin the budget season."
