How Would You Fundamentally Change Wisconsin if You Were a Woke Liberal? "Understand your Opponent's Goals by the Bills They Introduce"

MADISON - Representative Jerry O'Connor (R- Fond du Lac) released the following statement on Democrats' legislative proposals throughout the 2023-2024 Legislative Session:

“What are the priorities that the modern hard-left, non-traditional liberals would pursue if they were to capture the State Senate and Assembly in 2024? With Governor Evers ready to sign their bills into law, the left could fundamentally and adversely change Wisconsin for decades. The answer to this question has been provided to us with the clarity of a road map. All we need to do is to track the woke, central-government-empowered bills the Democrats introduced during the current 2023-2024 legislative session to see where they want to take us.

Energized by a well-financed 2023 strategic initiative to overhaul and create a new liberal majority on the State Supreme Court, the modern social liberals are using the legal system in an attempt to change the makeup of the State Legislature from a conservative to a liberal control. Their first major act was to put gerrymandering on steroids and re-construct district maps to give the Democrats a shot at securing control of the legislature.

When we review the bills the liberals are promoting, it should cause grave concern among the Wisconsin electorate. By and large, these bills do not represent the priorities and values of our state. These are the priorities of a minority within the Democratic party that want to deconstruct the society we have enjoyed since the establishment of the state and replace it with what? The chaos we see on TV in many blue states. The answer can be found in the bills they have already introduced.

Following the outcome of the 2022 elections in Minnesota and Michigan, we can learn how they used a one-seat legislative majority to convert their states into liberal bastions. The consequences they enacted in a matter of months will be felt for decades. This is the liberal initiative they are now pursuing for Wisconsin.

The quick conclusion is that we cannot afford to ignore what is happening around us. Conversely, we need to use every tool available to us to preserve the common-sense Conservative Values that built this state and nation and this approach is also the best pathway available to restore Wisconsin and America to where we can pass on a society and value system that is a long-term sustainable model for our children and grandchildren.

A segmentation of these Bills follows.
