

Kenosha Community Health Center, Inc. (KCHC) has been in Kenosha since 1995.

KCHC has 3 service sites in the City of Kenosha and a **NEW** opening in Kenosha County

- 22nd Ave. offering Medical and Behavioral Health services
- 14th Ave. offering Dental
- 52nd Ave. (at the Boys and Girls Club) offering Pediatric services
- **903 S. 2nd Street (Silver Lake)** offering Medical, Dental, and Behavioral Health services

We accept most forms of insurance and many of our patients have Medicaid, but we see our community members regardless of their ability to pay by assisting them in signing up for Medicaid or discounting services based on income. Visit: www.kenoshachc.org/insurance for more information.

Recent Update:

- In 2019, we had several new recruitments and developed some new collaborations with community partners, allowing us to strengthen and enhance how we serve our patients.
- We had renovations at our 22nd Ave clinic (4536 22nd Avenue), bringing forth improved flow for patient care.
- We celebrated a new facility in Silver Lake (903 S. 2nd Street), making us assessable to the West end of Kenosha County.

In our 25th years of operation, we will continue our focus on improving and building our organizational values of quality, service, teamwork, accountability, respect, and trust. We will introduce a few new initiatives, with “patient care” as our focus. The community can plan on more visibility from us throughout the year, along with a grand celebration in August to show our community appreciation.

If KCHC is not serving you, we graciously welcome you as a new patient.
