Rep. Shankland: Response to Governor Evers' State of the State Address

MADISON – Following Governor Tony Evers' 2024 State of the State address, Rep. Katrina Shankland (D–Stevens Point) released the following statement:

“Tonight, Governor Evers emphasized his eagerness to continue working on the most pressing issues impacting Wisconsin families, workers, and seniors. I strongly support the creation of an Interagency Council on Mental Health and a statewide Mental Health Action Plan, and I value the governor's efforts to strengthen access to contraceptives.

“I appreciate that Governor Evers highlighted vital issues to our state and region in his speech, including affordable childcare, access to mental healthcare, and expanding our state's workforce development initiatives. I stand ready to work with my colleagues in both parties in the Legislature to find commonsense solutions to the serious challenges Wisconsin faces.”
