

JAMES W. EDMING

STATE REPRESENTATIVE • 87TH ASSEMBLY DISTRICT

Testimony in Support of Assembly Bill 870

Assembly Committee on Health

January 25, 2018

Thank you, Mr. Chairman and committee members for holding this public hearing today and giving me the opportunity to speak to you in support of Assembly Bill (AB) 870. I would like to thank Senator Petrowski for working with me on this important legislation.

There is nothing quite like a Wisconsin summer. Our many lakes, streams, and forests allow our state to offer some of the best outdoor recreational opportunities in the world and make Wisconsin a great place to spend a week or two away at camp. Kids come from all around the nation to attend summer camps in Wisconsin. These camps are located in all corners of the state and are an important part of the state and local economy.

Recreational activities carry the risk of injury and camp activities are no exception. Many summer camps rely on volunteer doctors who give a week or two of their summer to serve as a camp doctor. Camp doctors ensure the safety of both campers and staff. While the vast majority of injuries treated by a camp doctor are minor (i.e. rashes, twisted ankles), having a doctor on hand provides an extra level of care that should be encouraged.

Many physicians who volunteer as a camp doctor are licensed in another state. Current law requires these very capable doctors to obtain a temporary license from the State of Wisconsin even if they are only volunteering for one week. Many of the requirements to receive this temporary licensure are very time consuming and camps are finding it harder to find physicians who are willing to go through this lengthy process just to volunteer for a week or two. Some camp doctors have said that it is more work to obtain the temporary license than to work at the camp itself.

AB 870 seeks to solve this problem by allowing a physician licensed in another state or territory of the United States or a foreign country or province to practice at a camp in Wisconsin for up to 20 working days in a year. To qualify for this exemption, the licensure standards where the physician is licensed must be substantially equivalent to those in Wisconsin. Also, a physician operating under this exemption would only be permitted to treat campers and staff.

At the request of the Department of Safety and Professional Services, we plan to offer a simple amendment to the bill. The amendment would require a physician to notify the state that they plan to work in Wisconsin under this exemption.

Mr. Chairman and members, I ask for your support of AB 870 and thank you again for the opportunity to testify before you today.
