Omnibus Motion
[LFB Papers #415 thru #419]

Motion:

Move to adopt the following provisions:

1. *Statewide Interoperable Radio Network Replacement (Paper #415)*. Provide \$500,000 GPR in 2022-23 for project management consultant services and reserve \$6,000,000 GPR in 2022-23 in the Joint Committee on Finance's supplemental appropriation for a statewide interoperable radio network to replace the existing Wisconsin Interoperable System for Communications (WISCOM).

Require DMA to oversee the development and operation of any current or future statewide public safety interoperable communication system and administer the system. Further, require DMA to issue a request for proposals for the system within 30 days of the bill's effective date and to execute a contract for the system by July 1, 2022. Allow DMA to enter into agreements for the maintenance and support of, upgrades to, and enhancements for the system.

Notwithstanding procurement regulations under s. 16.75 of the statutes, require that DMA submit a report to the Joint Committee on Finance for approval that addresses: (a) the rationale for selecting the proposed vendor; (b) the vendor's solutions to resolve capacity, coverage, and interference issues; (c) the vendor's current networks in the state and country; (d) the vendor's ability to comply with criteria established by the Interoperable Council or its subcommittees; (e) the extent to which the system could serve: current WISCOM users without compatible equipment, WISCOM users with an existing 800 MHz P25 system, WISCOM users with an existing VHF P25 system, and non-WISCOM users; (f) the number of agencies in each category previously described; (g) the system's ability to accommodate new users to enhance local radio coverage; (h) potential methods to use existing systems to reduce the system's costs or improve reliability; and (i) redundant systems and capabilities. Specify that the report be submitted after the vendor has been selected but before the contract has been executed.

2. *Next Generation 911 (Paper #416)*. Adopt Alternative A2 to provide \$7,879,600 SEG in 2021-22 and \$11,408,600 SEG in 2022-23 from the police and fire protection fund to develop the NG911 Emergency Services Internet Protocol Network and Geographical Information System database. In addition, provide \$6,000,000 SEG on a one-time basis in 2022-23 to help public safety answering points transition to NG911 by training staff, purchasing equipment, and upgrading software. Further, place \$1,500,000 SEG in 2022-23 in the Committee's SEG supplemental appropriation for legislation related to grants to local units of government for geographic information

systems to facilitate implementation of NG911. A corresponding decrease in SEG funding and increase in GPR funding under Shared Revenue and Tax Relief would occur.

3. *Urban Search and Rescue Task Force (Paper #418)*. Create a continuing GPR appropriation for training and equipment for a regional structural collapse team. Provide \$500,000 GPR in 2021-22 in the Committee's supplemental appropriation.

4. *Truax Field Microgrid System (LFB Summary Page 410, #5)*. Require DMA to conduct a study in 2022-23 to determine the feasibility of constructing an electric microgrid system at Truax Field in Madison, to include the Joint Force Headquarters, the State Emergency Operations Center, and the Joint Operations Center, and to provide a copy of the study to the Joint Committee on Finance. Authorize one-time expenditure of \$64,000 GPR in 2022-23 to support the study.

5. *General Fund Lapse (LFB Summary Page 412, #11)*. Require DMA to lapse \$130,094 GPR to the general fund in 2021-22 from the appropriation balances in the following continuing GPR appropriations: (a) regional emergency response grants (\$8,205); (b) mobile field force grants (\$116,978); and (c) emergency response supplement (\$4,911).

6. *Fuel and Utilities Reestimate (LFB Summary Page 412, #13)*. Reduce expenditure authority by -\$150,700 GPR in 2021-22 and -\$164,100 GPR in 2022- 23 associated with fuel and utility cost estimates at Army and Air National Guard facilities.
