Rep. Stuck's Response to Governor Evers' State of the State Address

MADISON – Representative Stuck issued the following statement in response to Governor Evers' State of the State address.

“Tonight, Governor Evers put forward a vision and a plan to bring the State of Wisconsin together, to put aside partisan politics, and to work on the issues which unite our citizens regardless of where they live.”

“We heard on the campaign trail, that voters want Wisconsin to invest in public education; that they want good roads and a sustainable way to fund them; that they want economic development that works for small business not just big corporations; and that they want high-quality, affordable healthcare coverage for their families.”

“Governor Evers has set the tone for the rest of this Legislative Session, putting people above partisanship, and good policy ahead of scoring political points. I hope that Republican Legislators will take the Governor's message to heart and put the values of their constituents ahead of the political wishes of their leadership.”
