FROM: Russ Kava, Fiscal Analyst

SUBJECT: Potential Effects of the Elimination of the Milwaukee Parental Choice Program on
Public K-12 School Districts

At your request, I am providing you with information on the Milwaukee parental choice program and the potential revenue limit and general school aids effects on public K-12 school districts if the program were eliminated.

Background

Under the choice program, state funds are used to pay for the cost of children from low-income families in the City of Milwaukee to attend, at no charge, private schools located in the City. Pupils in grades K-12 with family incomes less than 175% of the federal poverty level are initially eligible to participate in the program. Once in the program, a pupil remains eligible if his or her family income is less than 220% of the federal poverty level. A sibling of a choice pupil is also initially eligible to participate if his or her family income is less than 220% of the federal poverty level. The limit on the number of pupils who can participate in the program is statutorily set at 22,500 full-time equivalent pupils. For the October 15, 2007, general schools aids estimate, the Department of Public Instruction (DPI) estimated that 18,500 pupils will attend choice schools in 2007-08.

For each pupil attending a choice school, DPI pays the parent or guardian an amount that is equal to the lesser of: (a) the private school's operating and debt service cost per pupil related to educational programming; or (b) the amount paid per pupil in the previous school year adjusted by the percentage change in the general school aids appropriations from the previous school year to the current school year. If that percent change is a negative number, however, the per pupil payment does not change from the prior year. In 2007-08, the per pupil payment under choice program is \$6,501.

By law, DPI is required to reduce the general school aids for which MPS is eligible by an amount equal to 45% of the total cost of the choice program. The October 15, 2007, general school aids calculation uses an estimate of \$120.3 million for the total cost of the choice program in 2007-08. Thus, MPS's general school aids will be reduced by \$54.1 million.

Under revenue limits, MPS can levy to make up for the aid reduction. Under 2007 Act 20, a separate aid program was created to provide aid to districts with high poverty. By law, any high-poverty aid MPS receives from this program must be used to offset the choice levy attributable to the reduction in general school aid. In 2007-08, MPS will receive \$7.4 million in high-poverty aid. After consideration of this aid, the net aid reduction for MPS related to the choice program is \$46.7 million, which is 39% of the estimated cost of the program in 2007-08. The state thus funds 61% of the cost of the choice program, which is \$73.6 million in 2007-08.

Elimination of the Milwaukee Parental Choice Program

If the Milwaukee parental choice program were eliminated, the state would no longer make payments to the parents of choice pupils and there would no longer be expenditures from the choice program appropriation. General fund expenditures related to the choice program would be reduced in an amount equal to 55% of the total cost of the choice program (\$66.1 million in 2007-08). The 45% choice program reduction made to MPS general school aids (\$54.1 million in 2007-08) would also be eliminated. Because the state no longer has a commitment to fund two-thirds of partial school revenues, any increase in the MPS revenue limit that would result from choice pupils attending MPS would not result in an increase in general school aids by an amount equal to two-thirds of the revenue limit increase.

The fiscal effect of the elimination of the choice program would depend in part on two factors. The first factor is how the 55% state share of program costs would be appropriated in the absence of the program. (For the purposes of this memorandum, high poverty aid to MPS will not be considered.) One option would be to appropriate the funding for general school aids to account for the possible attendance of an unknown percentage of students to MPS. Another option would be to appropriate the funding to other programs or use it to improve the balance of the general fund. To illustrate the possible effects of the elimination of the choice program, this memorandum will consider both options.

The second factor would be the number of pupils that would attend MPS rather than pursue other educational opportunities, such as private schools or home schooling, and it is unclear how many would do so. To illustrate the possible revenue limit and general school aids effects of an alternative to eliminate the choice program, this memorandum presents five hypothetical examples of the fiscal effect of the elimination of the program using the alternative assumptions that 0, 25, 50, 75, or 100 percent of choice pupils attend MPS.

Under revenue limits, one-third of the number of choice pupils that attend MPS would count immediately under the three-year rolling average of enrollment. MPS revenue limits would fully

reflect the addition of choice pupils only in the third year. Because general school aids are calculated using prior year membership and shared cost data, the addition of choice pupils would not directly affect the amount of aid received by MPS until the next year. Once these pupils and their related shared costs would be fully included by MPS for general school aid purposes, there would be aid shifts. Table 1 shows the potential revenue limit, general school aid, and levy changes that would have occurred in 2007-08 for MPS and the other districts in the state, in total, if the indicated percentage of pupils attended MPS and no additional funding had been appropriated for general school aids. Table 1 is calculated as if the pupils and costs would be fully phased-in for purposes of revenue limits and general school aids.

TABLE 1

Potential 2007-08 Revenue Limit, General Aid, and Levy Changes if Various Percentages of Pupils Attended MPS and No Additional Funding was Appropriated for General School Aids

(\$ in Millions)

<u>Percent Attending MPS</u>	<u>MPS</u>			<u>Other Districts</u>		
	<u>Revenue Limit</u>	<u>General Aid</u>	<u>Levy</u>	<u>Revenue Limit</u>	<u>General Aid</u>	<u>Levy</u>
0%	\$0.0	\$54.1	-\$54.1	\$0.0	\$0.0	\$0.0
25	46.3	94.6	-48.3	0.0	-40.4	40.4
50	92.7	135.1	-42.4	0.0	-81.0	81.0
75	139.0	175.8	-36.8	0.0	-121.7	121.7
100	185.4	216.4	-31.0	0.0	-162.3	162.3

Table 2 shows the potential revenue limit, general school aid, and levy changes that would have occurred in 2007-08 for MPS and the other districts in the state, in total, if the indicated percentage of pupils attended MPS and the \$66.1 million state share of the choice program had been appropriated for general school aids. The same assumption used in Table 1 relating to fully phased-in cost is used in Table 2.

TABLE 2

Potential 2007-08 Revenue Limit, General Aid, and Levy Changes if Various Percentages of Pupils Attended MPS and \$66.1 Million of Additional Funding was Appropriated for General School Aids

(\$ in Millions)

Percent <u>Attending MPS</u>	MPS			Other Districts		
	Revenue <u>Limit</u>	General <u>Aid</u>	Levy	Revenue <u>Limit</u>	General <u>Aid</u>	Levy
0%	\$0.0	\$59.6	-\$59.6	\$0.0	\$60.6	-\$60.6
25	46.3	100.1	-53.8	0.0	20.1	-20.1
50	92.7	140.8	-48.1	0.0	-20.5	20.5
75	139.0	181.5	-42.5	0.0	-61.2	61.2
100	185.4	222.3	-36.9	0.0	-102.0	102.0

The attachments to this memorandum provide additional detail on the information presented in the tables. Attachment 1 shows the net general school aid payments received by school districts in 2007-08 under current law as well as the estimated payments these districts might have received under each of the alternative assumptions that 0, 25, 50, 75, or 100 percent of choice pupils attended MPS and no additional general school aids funding had been appropriated. Attachment 2 shows the same information for the scenario under which an additional \$66.1 million of general school aids funding had been appropriated. Under revenue limits, those school districts shown with an increase in aid under any of the alternatives would have decreased levies in an amount equal to the increase, while districts with an aid decrease would have the option of increasing their levies up to an amount equal to the decrease.

The aid changes shown in the tables and the attachments would reflect the effects of three factors. First, the elimination of the choice program reduction to MPS general school aids would have benefited MPS, with \$54.1 million of the increase in general school aids for MPS in each scenario attributable to this factor. Second, for those scenarios under which some percentage of pupils would attend MPS, statewide membership would have been increased and the tertiary guarantee would have been slightly lower, which would have reduced the tertiary aid received by most districts with tertiary costs. Third, under the same scenarios, membership and shared costs for MPS would have been increased, which would have resulted in MPS receiving more aid under the equalization aid formula, and a lower secondary guarantee would have resulted to fully distribute the amount appropriated for general school aids. However, under the scenarios under which additional aid would have been appropriated, the reduction in the secondary guarantee would not have been as great, resulting in additional aid for most districts compared to the scenarios under which additional aid would not have been appropriated.

It should be noted that, while MPS would gain both revenue limit authority and general school aids as a result of choice pupils attending MPS when fully-phased in, in the first year after elimination of the choice program, MPS would be responsible for educating a given number of additional pupils, but only receive revenue limit authority for one-third of that amount, since revenue limits use a three-year rolling average. Also, since general school aids are calculated using prior year information, MPS would not receive aid for any additional pupils or shared costs in the first year after elimination of the choice program.

Finally, it must be emphasized that these examples are speculative. Assumptions have been made on the effects on MPS membership and shared costs and the examples are calculated as if all of these factors had been fully effective in 2007-08. Changes to the assumptions could significantly modify the results. These examples should be considered as an illustration of the potential range of effects of an alternative to eliminate the choice program.

I hope this information is helpful. Please contact me if you have further questions.
