

# Biogas Energy: “Versatile, Scalable, Economical”

Mark J. Torresani, P.E.  
Cornerstone Environmental Group, LLC

Wisconsin Biogas Informational Symposium  
Madison, Wisconsin  
February 15, 2012

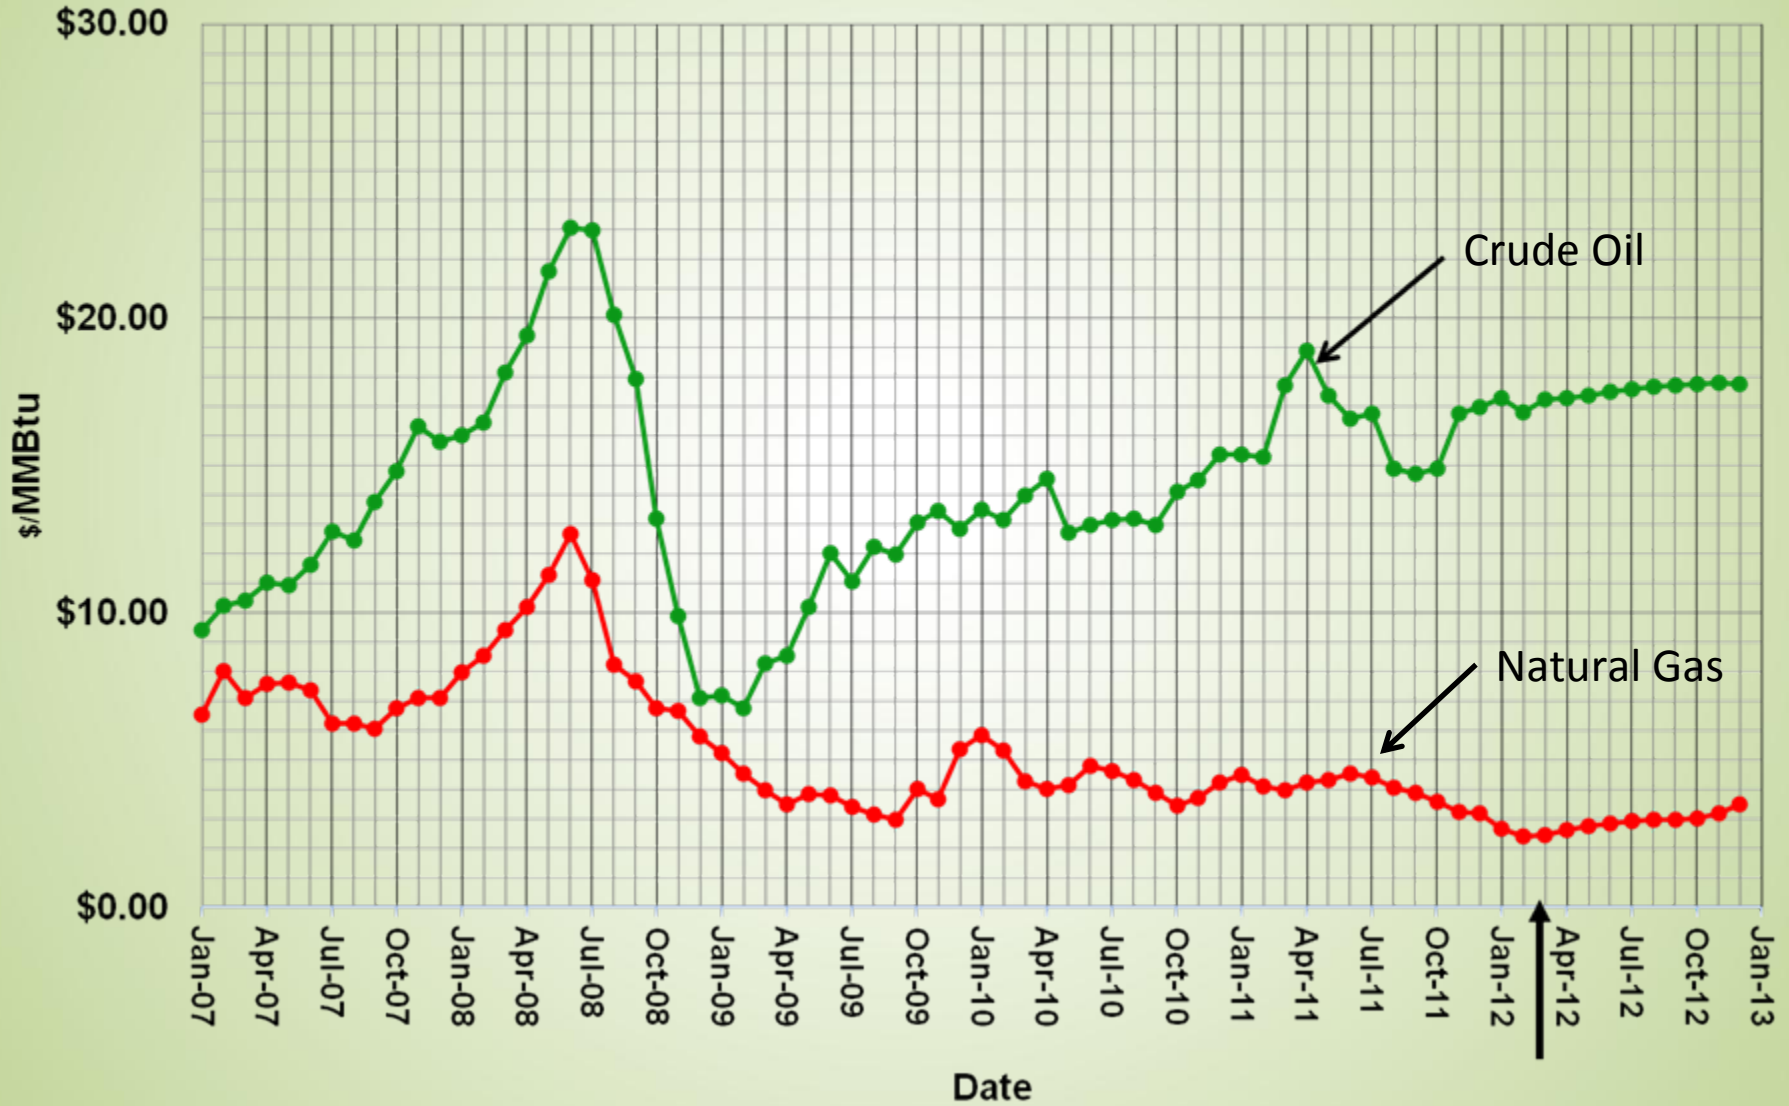

# Why Biogas?

## Why Wisconsin?

- **Economically Sustainable**
- **Environmental Attributes**
- **Home Grown Fuel Source**
- **Small Scale to Large Scale**
- **Many Uses: Heat, Electricity, Vehicle Fuel**
- **Very Large Growth Potential**

**Crude Oil-Natural Gas Comparison Chart**  
January 2007-December 2012  
(as of February 2012)

Sauk County  
Landfill

Crave Brothers Dairy Farm Digester  
Waterloo, Wisconsin.

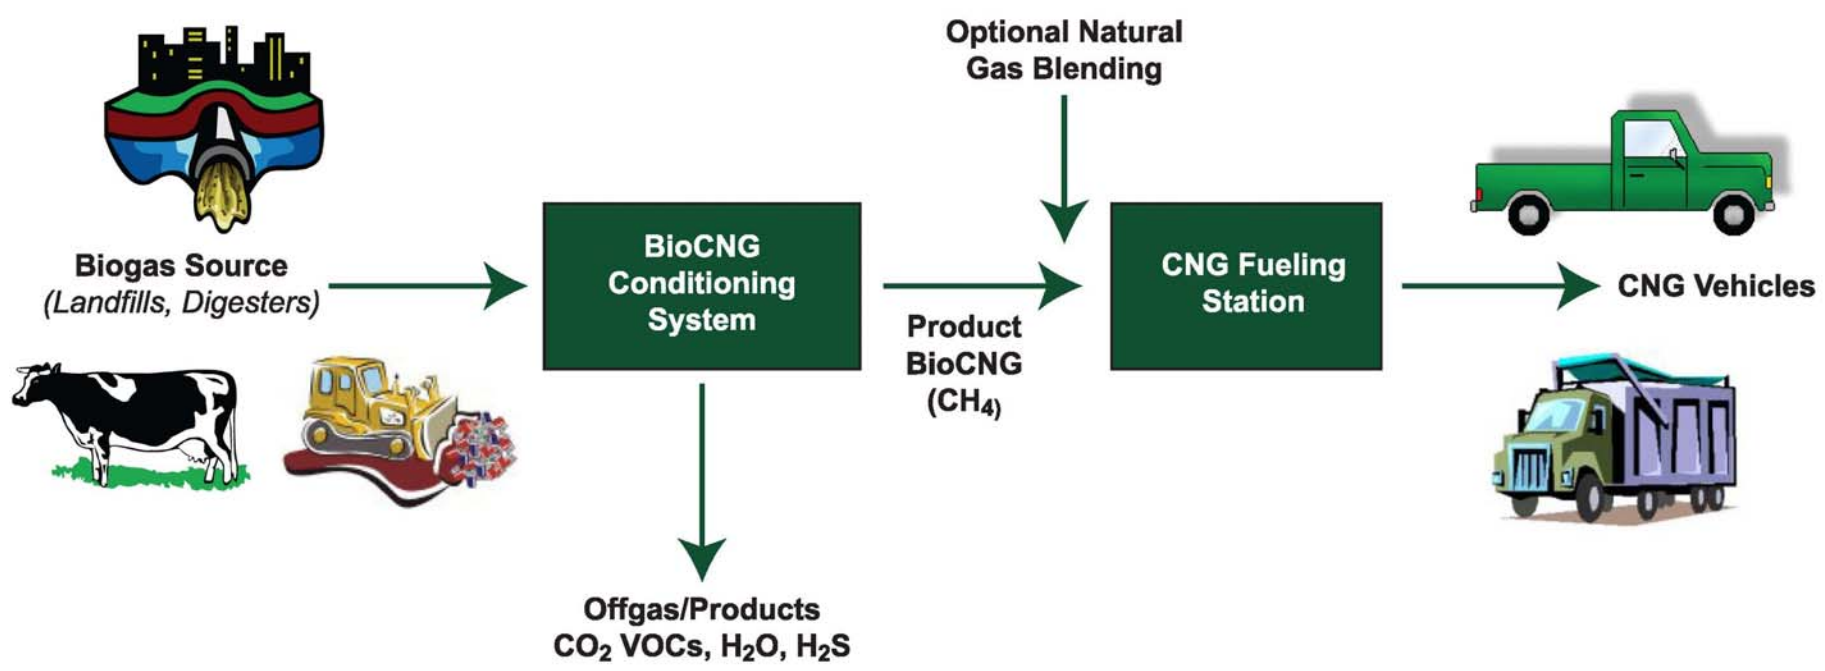

Sheboygan Waste Water  
Treatment Plant

# BioCNG Vehicle Fueling System

August 2011, Operating System

**Dane County First BioCNG Vehicle Fueled March 18, 2011**

Ford 2011 F350 CNG / Gasoline Pickup Truck  
Delivered to Dane County January, 2012

Topeka, Kansas January, 2012  
\$1.199 / Gasoline gallon Equivalent (GGE)

St Landry Parish, Louisiana

BioCNG 50 system delivered to site on February 14, 2012

Job creation !

# A Changing Market

- Economic incentives drive the use CNG vehicles and the use of BioCNG.
- Greater public awareness of CNG and BioCNG
- More Public CNG stations are being developed
- Opportunities for training programs for CNG and BioCNG system operations and maintenance
- Over 13 Million CNG vehicles in use around the world, approximately 130 in WI

# Opportunities for Wisconsin

- **Other projects being developed and starting up in 2012**
  - St Landry Parish, Louisiana February 2012
  - Janesville Wisconsin, Waste Water Treatment Plant, January 2012
  - Approximately 80 other facilities are considering BioCNG use
- **Cost Effective Vehicles / Conversions are needed**
  - Technicians are needed now! Training needed now!
- **Public Awareness of CNG and BioCNG is growing in Wisconsin**
  - Typical Questions: Where can we get the fuel? Where can we get a conversion?
