Wisconsin Legislature – Legislative Technology Services Bureau

Position Title: DevOps Engineer
Location: 1 S Pinckney St STE 615, Madison, WI 53703
Schedule: Full Time

Introduction
The Legislative Technology Services Bureau (LTSB) is a nonpartisan legislative service agency that provides leading-edge information technology services and support to the Wisconsin Legislature. LTSB promotes an innovative and cooperative atmosphere with many opportunities for professional growth.

In addition to a comprehensive compensation and benefits package, LTSB offers an enjoyable work environment and an excellent work/life balance. We are located on the Capitol Square in beautiful downtown Madison, Wisconsin. Our offices are walking distance away from the Monona Terrace, the Dane County Farmer's Market, and historic State Street.

LTSB is currently accepting applications for a skilled and enthusiastic DevOps Engineer to join our Enterprise team. Salary is dependent on experience and qualifications.

Position Overview
As a DevOps Engineer at LTSB, you will play a key role in maintaining and evolving the infrastructure that powers the Legislature's applications and services. You'll collaborate with multiple teams to ensure secure, reliable, and efficient delivery of technology solutions. This role is ideal for someone who thrives on solving problems, automating processes, and building scalable systems.

Key Responsibilities
- Administer and support Linux and Windows Server environments
- Maintain and optimize web and application delivery infrastructure
- Manage and enhance CI/CD pipelines
- Manage and maintain Content Management System infrastructure
- Support and monitor server infrastructure using automation
- Support source control and versioning practices
- Troubleshoot and resolve issues related to networking, servers, and applications
- Contribute to infrastructure-as-code and DevOps automation initiatives
- Participate in cross-functional projects and documentation efforts
- Provide excellent customer service in a nonpartisan setting

Knowledge & Experience Desired
- Technical Skills
    - Linux (Ubuntu) and Windows Server administration
    - IIS Server Management
    - Content Management System administration (Umbraco or other .NET CMS)
    - ADC/Load Balancer configuration and management (NGINX, F5, or other appliances)
    - CI/CD pipeline experience (TeamCity preferred)
    - Infrastructure-as-code automation experience (Puppet, Chef, or other IaC software)
    - Git Source control and versioning solutions (Gitlab, Bitbucket, etc.)
    - Experience with scripting languages (PowerShell, Python, C#, Ruby)
    - Understanding of containerization and Kubernetes concepts
- Professional Skills
    - Strong troubleshooting and problem-solving abilities
    - Excellent communication, collaboration, and documentation skills
    - High motivation and a self-starter mindset
    - Commitment to customer service and teamwork
    - Ability to work effectively in a nonpartisan environment
