## Radical Anti-Police Groups in Madison In Their Own Words

Today, I am sharing with you an excellent video news piece from the **MacIver News Service** reporting on the actual statements from the leaders of two Madison-based radical organizations. Freedom, Inc., and Madison Urban Triage have been instrumental in organizing street protests in Madison all last week and continuing their efforts this week.

The leadership of both groups, Freedom, Inc., and Madison Urban Triage openly encouraged the rioting and looting that occurred in Madison as “actions of liberation.” During a press conference last week and in other forums in recent days, these groups have expressed demands for disbanding police departments, releasing all criminals from prisons/jails and the removal of police officers from our schools.

However, these radicals are now accusing all American institutions of being racist and beyond reform. They oppose capitalism and democracy, while promoting socialism and liberal mob rule, or as they call it, “community control.” City leaders in Madison and Wisconsin Democrat elected officials have refused to condemn their outrageous demands and are moving to promote some of these policies.

As a society, we can no longer ignore these extremists and assume it is just rhetoric. Their mission is to create mayhem and threaten our communities with violence unless we all surrender to their demands.

It is important that we hear them in their own dangerous words.
