Republicans Continue to Peddle COVID Lies

While Wisconsin hospitals reach maximum capacity, GOP leaders hold public hearings on bills that spread misinformation

MADISON - Today, the GOP Committee on Health Chair held public hearings on a slate of bills that would limit private business ability to stop the spread of COVID-19 within their place of business.

Senator Melissa Agard (D-Madison) released the following statement:

“As we near the two year mark of the COVID-19 pandemic and cases are skyrocketing, Republicans are still promoting and peddling misinformation that contradicts scientists and medical professionals. We, as a state, have to do better in order to best protect ourselves and those who are most vulnerable in our communities.

“The testimony being heard today in the Senate Committee on Health is dangerous and continues to perpetuate false narratives about COVID. Our neighbors and loved ones are dying. We need to put the falsehoods to bed and listen to our medical experts to best protect ourselves, our neighbors, and our medical professionals.

“What we should be doing is providing our communities and healthcare professionals the necessary tools to stop this surge of COVID cases. We should be respecting Wisconsin businesses who are trying to keep their employees and communities safe. We should be properly thanking our healthcare heroes by passing the bill introduced by Representative Vining, Senator Erpenbach, myself, and many other Democratic colleagues today to honor their sacrifices throughout this pandemic.

“Let’s lift up our healthcare workers, scientists, and medical professionals by passing common sense legislation that supports them and the heroic work they have been doing for nearly two years.
