STATEMENT ON GOVERNOR EVERS' PROPOSED "VIOLENCE PREVENTION EFFORTS"

"Let me get this straight, Milwaukee's Office of Violence Prevention was so ineffective at preventing violence that they fired the director and renamed the office. But now, Governor Evers wants to replicate that failure at the state level? And he wants to implement gun control that has failed to prevent gun violence anywhere in the country?"

"This isn't hard. You don't need to grow government to prevent violence. If Governor Evers is serious about ending violence and crime, he should support law enforcement and give them the tools and resources they need. He should order Milwaukee Public Schools to follow the law and hire resource officers. He should tell his District Attorney buddies to charge and lock up criminals. Eliminating violence requires taking violent criminals off the street."
