SUBJECT: K-12 Public School GPR Funding as Change to 2010-11

At your request, I am providing information relating to general purpose revenue (GPR) funding appropriated for aid to K-12 public schools since 2010-11, based on the final action of the Legislature in each biennium.

Table 1 shows the GPR amounts budgeted for school aids in each fiscal year from 2010-11 through 2018-19 in actual dollars and as adjusted for inflation, using the consumer price index (CPI) for all urban consumers. Table 1 also presents the change to the prior year as well as the change to 2010-11. The inflation-adjusted numbers show what funding would have been, had the 2010-11 budgeted amounts been increased by the change in CPI in each year.
